Retrofit: A second life for your production lines

Machines often come with a basic structure which is designed for a decades-long active life. What ages far more quickly is their automation system. With retrofit measures you can extend the useful life considerably and save yourself the costs of a new investment.

Replace older drive and control components with the latest products: Standardized retrofit kits from Rexroth have a big impact for little cost and effort. They increase productivity and minimize your spare parts storage costs.

Benefits of a Rexroth retrofit:

- ▶ Quick, cost-effective retrofit measures using complete retrofit kits
- ▶ Less time needed thanks to 1:1 replacement solutions
- ▶ Increased capacity through installation of cutting-edge components
- ▶ Enhanced machine safety with Safety on Board safety functions and greater energy efficiency with Rexroth's 4EE classification system

Service portfolio

Maximum equipment availability throughout the entire life cycle for a higher level of productivity of your manufacturing systems: Our extensive services provide you world-wide with the support you need to achieve these goals.

**Spare parts service:****The right spare parts in the right place**

When a machine fails, it is vital to receive the right spare parts without delay. This applies in particular to old machinery and plant. Our experienced specialists are sure to find the solution in our diverse product portfolio – quickly and world-wide.

**Field service:****Close proximity and a fast response**

Time for maintenance? Need a repair? A quick diagnosis is required in order to arrange for the necessary measures. Our service specialists in 80 countries provide quick and competent support.

**Remanufacturing:****Fast, efficient, as good as new**

Why wait until a machine breaks down? It often makes sense to replace wearing parts or electronic components as a preventative measure during scheduled breaks in production. This way you increase the availability of your plants with minimum outlay.

**Repair service:****An industrially reproducible service**

Replacement is not always the only option. Particularly where expensive components and modules are concerned, a cost-effective repair is often possible – when you select Rexroth as your partner. Our service workshops soon get your components back in good shape.
